

4 Courses

Introduction to Computer Security

Introduction to Network Security

Security Management and Governance

Cybercrime

Jun 3, 2025

Curtis Mattoon

has successfully completed the online, non-credit Specialization

Cyber Security – Technology and Governance

In this specialisation learners covered topics ranging from the security of computer system and networks, that are the key elements in cyber security, to the key role of human aspects in cybercrime. They studied fundamental concepts of how computers work, computer system core components and then extended this to consider a variety of topics from hardware to applications. Learners were presented with some of the key components of practical cyber security management and its governance. This included what happens when things go wrong, understanding how organisations can respond to incidents, through to the essential role of people in achieving better cyber security outcomes.

The online specialization named in this certificate may draw on material from courses taught on-campus, but the included courses are not equivalent to on-campus courses. Participation in this online specialization does not constitute enrollment at this university. This certificate does not confer a University grade, course credit or degree, and it does not verify the identity of the learner.

Fauzia Idrees Abro PhD
