**Curtis Mattoon**

has successfully completed the online, non-credit Specialization

# Security: A Comprehensive Approach

This specialization focuses on securing operating systems and cloud environments, covering topics such as OS security, cloud security, and threat mitigation. Learners will gain hands-on experience with security tools and best practices, preparing them for roles in IT security and cloud architecture.

The online specialization named in this certificate may draw on material from courses taught on-campus, but the included courses are not equivalent to on-campus courses. Participation in this online specialization does not constitute enrollment at this university. This certificate does not confer a University grade, course credit or degree, and it does not verify the identity of the learner.
